PUBLIC SAFETY TECHNOLOGY ALLIANCE SPOTLIGHTS FUTURE OF INTEGRATED MISSION-CRITICAL OPERATIONS

New Alliance Fusion Center Demonstrates Advanced Technologies for Command-and-Control Environments in Public Safety, Security, Emergency Management and Critical Infrastructure

News Summary

- The Public Safety Technology Alliance is opening the Alliance Fusion Center, a unique new command-and-control demonstration facility in Brea, Calif.
- The center allows public safety, government and critical infrastructure organizations to experience integrated mission-critical technologies before deployment.
- A grand opening event will be held Aug. 4, with executive briefings, live demonstrations, technology evaluations and collaborative planning sessions available for attendees.
- The founding members of the Public Safety Technology Alliance, whose innovations will be featured at the Alliance Fusion Center, are industry leaders LG Electronics USA, Premier Mounts, Datapath, and Evans Consoles.

BREA, Calif., July 28, 2026 – The Public Safety Technology Alliance, a collaborative initiative of leading technology providers to mission-critical command-and-control environments, announced the opening of the Alliance Fusion Center, a new demo center located at the Premier Mounts Southern California facility in Brea, Calif.

Designed as an immersive technology command center, the Alliance Fusion Center enables public safety agencies, government organizations, consultants, architects, system integrators and technology partners to experience fully integrated command-and-control environments before planning or deploying their own operations center. The center features multiple operational scenarios, including Real Time Crime Centers (RTCCs), Emergency Operations Centers (EOCs), Security Operations Centers (SOCs), emergency communications, transportation management and other mission-critical applications.

At the Alliance Fusion Center's grand opening event on Aug. 4 from 12 noon to 4 p.m. PDT, visitors will be able to discover how next-generation control rooms come to life by scheduling executive briefings, live solution demonstrations, technology evaluations, design consultations and collaborative planning sessions.

Inside the Alliance Fusion Center

The Alliance Fusion Center is built for police departments, sheriff's offices, emergency communications centers, emergency operations centers, transportation agencies, utilities, campus

Life's Good.

public safety organizations, corporate security teams, government organizations, consultants, architects, system integrators and technology partners seeking to modernize mission-critical operations.

During the launch event, organizations can:

- Experience live demonstrations across multiple operational environments
- Explore integrated workflows and interoperable technologies
- Evaluate advanced visualization and video wall solutions
- Review operator workspace design and ergonomics
- Participate in executive briefings and technical workshops
- Collaborate with Alliance experts on future command center initiatives.

Following the event, customers, partners and systems integrators can schedule live demonstrations at the center to evaluate technology solutions before deployment, giving decision-makers a hands-on opportunity to visualize, test and validate operational workflows before making a purchase decision.

The Alliance Behind the Fusion Center

The Public Safety Technology Alliance was created with a shared vision: to provide customers with the opportunity to experience a complete command-and-control ecosystem operating as an integrated solution.

The Alliance Fusion Center features technologies from the Alliance's four founding members:

- [LG Electronics USA](#): Commercial-grade displays and visualization technology
- [Premier Mounts](#), a subsidiary of Gamber-Johnson LLC: Professional display and rugged workstation mounting systems, mission-critical mobility solutions for fixed and mobile operations, AV integrations and infrastructure solutions
- [Datapath](#): Video wall controllers, graphics processing and multi-source content management
- [Evans Consoles](#): Mission-critical command center consoles and operator environments

Working together, these technologies demonstrate how an integrated command center can support crime analysis, emergency response coordination, emergency communications, security monitoring, transportation operations, critical infrastructure management, incident command and real-time decision-making. To hear perspectives from each founding member, see [here](#).

About LG Electronics USA

LG Electronics USA serves commercial display customers in the U.S. lodging and hospitality, digital signage, systems integration, healthcare, education, government and industrial markets. Based in Lincolnshire, Ill., with its dedicated engineering and customer support team, LG's U.S. Media Entertainment Solution B2B division delivers business-to-business technology solutions tailored to the particular needs of business environments. Eleven-time ENERGY STAR® Partner of the Year LG Electronics USA Inc., headquartered in Englewood Cliffs, N.J., is the North American subsidiary of LG Electronics Inc., a leading smart life solutions company with annual global revenues of more than \$60-billion from consumer electronics, home appliances, HVAC solutions and vehicle components. For more information, please visit www.LGSolutions.com. Stay up to date with @LGforBusinessUSA on [LinkedIn](#), [Instagram](#), [Facebook](#) and [YouTube](#).

About Premier Mounts

Premier Mounts, a subsidiary of Gamber-Johnson LLC, has engineered trusted professional A/V mounting solutions since 1977. Built on a people-first culture, the company combines innovative design, quality craftsmanship, and responsive support to help customers create exceptional audiovisual experiences. Visit www.premiermounts.com to learn more.

About Datapath

Datapath is a world leader in video wall and multi-display control technologies. The company designs and manufactures scalable, high-performance video wall controllers, capture cards, and AV-over-IP solutions that power mission-critical command and control centers, enterprise collaboration environments, and creative visual installations worldwide. Founded in 1982 and now distributed across five continents, Datapath has customers in more than one hundred countries worldwide, covering multiple industries such as professional audio and video, military, education, security, and health care. Datapath is a privately held company with a head office in Derby, UK, plus sales and support offices in the USA, Latin America, France, Germany, and Japan. By listening carefully to customers, continuous improvement, and putting quality in everything it does first, Datapath solutions are Excellent by Design.

About Evans Consoles

Evans Consoles is a global leader in the design and manufacture of mission-critical control room solutions. With more than forty-five years of experience serving public and private sector clients, Evans delivers ergonomic, durable, and highly functional work environments that support the most demanding operational needs.
